

Notice #02/2019

Clarification on Swan 45 Class Rules

D.3.1 (a) (iii) - Propeller

The Swan 45 Class Rules (D.3.1 (a) (iii)) specify that the propeller must be a Flex-o-fold 2-blade 17" x 13" LH Racing however it has been confirmed with Flexofold that this propeller is no longer in production and there is no option to continue the manufacture of this propeller.

Following investigation by the Class it has been identified that an alternative equivalent propeller is the Gori Racing 475 x 330 x 2 LHS

Diameter: 475mm = 18" / Pitch: 330mm = 13"

With an urgent need for a boat to fit a replacement propeller, dispensation has been granted to use this propeller until 31st December 2019 prior to a formal rule change based on a Class Vote.

Any other boats who have an urgent need to replace the Flexofold propeller should apply to the Class Manager for dispensation.
