# New boats

A look at the latest launches from around the globe

## ClubSwan 41

---

The ClubSwan 41 is the latest in the new generation of one-design racers launched by the Finnish manufacturer. The boat sits between the ClubSwan 36 and 50 in its range, and promises a similar blend of amped up performance combined with dramatic looks and potential for extremely fast cruising. Like the other boats in the range, the 41 is designed by Juan Kouyoumdjian and will compete in ORC Category B.

As you'd expect, the boat is very light at 6,200kg and also features a massive sail area with the mast stepped almost centrally allowing for a very large fore triangle. This is a serious racing machine but the interior remains important and Swan has worked with New Zealand studio Pure Design & Engineering and Lucio Micheletti to create a modern, comfortable space.
